## PROJECTS

### Trivia App

January 2019

- Developed a trivia application that utilizes a RESTful API implemented on the asp.net framework.
- This project allows me to display my ability to work with Java, C#, XML, Gradle, HTML, and SQL.
- The service works under MVC convention and satisfies the three core conditions necessary to be considered RESTful.

### Preventability in the Cybersecurity Domain

May 2018

- Collaborated with faculty to research steps companies can take to prevent cyber security attacks.
- Examined previous security breaches within organizations to provide recommendations on strategies companies can implement to eliminate future breaches of the same nature.
- Selected for publication by the National Cybersecurity Student Association.

## EXPERIENCE

### Arcadia University – Information Technology

Glendale, PA

Technical Support Services

09/2016 – 05/2018

- Provided technical support to over five thousand members of the university including staff, faculty, and students by setting up computer systems and audio-visual equipment in classrooms as well as offices.
- Supported technical needs remotely to abroad student and staff through the utilization of hypervisors to virtually resolve account issues, security breaches, and computer malfunctions for end users on Arcadia campuses.
- Gained industry specific knowledge through mentorship from industry-standard specialists.

### Abercrombie and Fitch

Willow Grove, PA

Retail Sales Associate

01/2017 – 03/2018

- Drove sales in a semi-competitive space and aided departments by keeping it well-organized environment.
- Received five “Employee of the Month” awards based on knowledge and customer service skills.
